Professional Summary

Computer Science graduate with strong technical fundamentals and a collaborative mindset. Experienced in working on end-to-end projects involving development, coordination, and presentation. Adept at communicating ideas clearly, organizing team efforts, and translating abstract goals into structured execution. Looking to contribute to dynamic roles in tech project coordination, analysis, or system improvement where both people skills and problem-solving matter. Ready to learn, adapt, and grow in cross-functional tech environments.

Education

B.Tech in Computer Science, SRM Institute of Science & Technology – CGPA: 8.62 | 2021–2025

12th Grade, Vishwa Bharati Public School – 80.4% | 2020–2021

10th Grade, Vishwa Bharati Public School – 75% | 2018–2019

Experience

Larsen & Toubro (L&T) —Internship (January 2025 - April 2025)

- Worked on internal tool optimization using Python, Excel, and automation scripts reducing manual report generation time by 30%.
- Frequently documented processes and shared regular progress updates with mentors.
- Balanced solo tasks and team meetings, keeping timelines and goals aligned.
- Gained hands-on exposure to how development teams operate in a structured setting.

Skills

Technical Skills: Python, SQL, Power BI, Excel, HTML, CSS, JavaScript, React

Frameworks & Tools: Flask, Django, Git, GitHub, Google Cloud API, JIRA

Concepts: Data Analysis, Agile Methodologies, SDLC, Project Management

Languages: Hindi (Native), English (Proficient), German (A1)

Soft Skills: Effective Communication, Teamwork, Leadership, Problem Solving, Decision Making, Time Management

Certifications

- Full Stack Web Development – Udemy
- Back-End Application Development Capstone – IBM (Coursera)
- Data Science Math Skills – Coursera

Projects

- **Excel Insight Master** (Python, Pandas, NLP, Matplotlib, Seaborn): Built a Python-based tool to automate Excel data analysis. Enabled users to ask natural language questions and receive visual insights through dynamically generated charts and summaries.
- **Sentiment Analysis Dashboard** (Python, ML, SQL, NLP): Designed and implemented an interactive dashboard to analyze user sentiment from text data. Used NLP models to process and classify sentiment, with backend support for structured data queries using SQL.
- **E-Learning Platform** (Flask, Google Cloud API, HTML/CSS/JS): Developed a secure video-based learning app that supports authenticated upload, playlist creation, and smooth video playback. Deployed using Google Cloud & Render for public access.

Extra-curricular Activities

- Lead organizer of college-level hackathons, managed planning, team coordination, and on-stage hosting.
- Core member of fashion club, directed model styling, show timelines, and backstage flow.
- Junior Diploma in Kathak (Classical Dance) – developed discipline, stage confidence, and creative expression through years of formal training.
- These roles strengthened my ability to handle real-time issues, work under pressure, and connect with diverse personalities.
